Lab Assignment - 6 (Project-A)
Group No. 26
Resume Analyzer for College Placements

Member ID's : 202401262, 202401216, 202401429, 202401224, 202401229, 202401230, 202401239, 202401264, 202401265, 202401452

2.1 Stakeholders & Elicitation

	Stakeholders	Elicitation Technique(s)	Status	Notes / What's Gathered So Far
S1	Students / Job Seekers	Surveys / Questionnaires, Semi-Structured Interviews, Observation , Prototype Evaluation	In Progress	Survey shared and classmate interviews done. Students want a resume score, skill gap analysis, keyword and formatting tips, and job matching. Prototype evaluation pending.
S2	Placement Cell / Placement Officers	Semi-Structured Interviews, Document Analysis, Requirements Workshop	In Progress	Studied sample placement forms and spreadsheets. Officers need batch-level readiness reports and common resume mistakes. Formal interview pending.
S3	Faculty / Placement Coordinators / Career Counselors	Interviews, Focus Groups, Observation, Prototype Evaluation	Completed	Faculty want explainable feedback they can discuss with students, and the option to add comments.
S4	Recruiters / HR Professionals	Structured / Semi-Structured Interviews, Observation, Document Analysis	In Progress	Studied job descriptions and ATS skill matching. Must-have vs optional skills identified. Recruiter interview pending.
S5	Hiring Managers	Scenario-Based Interviews, Document Analysis, Prototype / Demo Review	Not Yet Started	Will start once the prototype is ready, to confirm what makes a shortlist trustworthy.
S6	Development Team	Brainstorming, Requirements workshop, Interface analysis	Completed	Features, system boundary, parsing approach and scoring rules agreed. Parsing libraries and APIs shortlisted.
S7	Academic Supervisor / Professor	Document analysis (project guidelines), Review meeting	Completed	Project objectives, deliverables and evaluation criteria confirmed.

S8	Data Privacy & Fairness Reviewer	Document analysis (DPDP Act 2023), Scenario-based elicitation	In Progress	Consent before upload, secure storage and deletion rules identified. Name, gender, photo and college name must not affect the score.
S9	Job Portals (external system)	Document analysis, Interface analysis	In Progress	Reviewing API access, rate limits and terms of use. A local job-description dataset is the fallback.

2.2 Requirements

ID	Functional Requirement	Main Elicitation Source	Priority	Status
FR-01	The system should allow students to upload a resume.	Survey, Observation	High	In Progress
FR-02	The system should parse the uploaded resume.	Interview, Brainstorming	High	Final
FR-03	The system should extract relevant skills from the resume.	Survey, Recruiter Interview	High	In Progress
FR-04	The system should analyse the resume using defined criteria.	Survey, Interview	High	In Progress
FR-05	The system should generate a resume score.	Survey, Interview	High	In Progress
FR-06	The system should identify important areas for improvement.	Survey, Observation	High	In Progress
FR-07	The system should provide improvement suggestions.	Survey, Faculty Interview	High	In Progress
FR-08	The system should compare resume skills with job requirements.	Recruiter Interview, Document Analysis	High	Final
FR-09	The system should show matching and missing skills for a selected job.	Recruiter Interview	High	Final
FR-10	The system should provide appropriate dashboards/reports for authorized users.	Placement Interview, Workshop	Medium	Final
FR-11	The system should handle invalid or unsupported resume input.	Observation, Prototype	High	Final

FR-12	The system should restrict access to information according to user roles.	Privacy / System Administration Discussion	High	Final
-------	---	--	------	-------

ID	Non-Functional Requirement	Main Elicitation Source	Priority	Status
NFR-01	The system should be easy to use for students with different levels of technical knowledge.	Survey, Observation	High	In Progress
NFR-02	Resume analysis should provide results within an acceptable response time.	Survey, Recruiter Interview	High	In Progress
NFR-03	Resume information should be protected from unauthorized access.	Privacy Discussion, Document Analysis	High	Final
NFR-04	The system should provide consistent results for the same input and configuration.	Technical Discussion	High	Final
NFR-05	Recommendations and important results should be understandable.	Faculty Interview, Prototype	High	Final
NFR-06	The system should provide clear error messages for invalid input.	Observation, Prototype	Medium	Final
NFR-07	The system should support role-based access control.	System Administration / Privacy Discussion	High	Final
NFR-08	The interface should be readable and accessible.	Observation, Prototype	Medium	Final
NFR-09	The system should be maintainable so that parsing, scoring and matching components can be updated.	Brainstorming	Medium	Final

ID	Domain Requirement	Main Elicitation Source	Priority	Status
----	--------------------	-------------------------	----------	--------

DR-01	Resume analysis should focus on information relevant to college placement and internship preparation.	Placement Discussion	High	Final
DR-02	Required and preferred skills should be distinguished when specified in the job description.	Document Analysis	High	Final
DR-03	Related or equivalent skills may need to be considered during skill matching.	Recruiter Interview	High	Final
DR-04	Placement eligibility should follow the rules of the relevant placement process.	Placement Documents	High	Final
DR-05	Student placement information should be accessible only to authorized roles.	Placement / Privacy Discussion	High	Final
DR-06	Resume information should be handled according to applicable institutional privacy rules.	Policy Analysis	High	Final
DR-07	Irrelevant candidate characteristics should not unfairly influence scoring or matching.	Fairness Discussion	High	Final
DR-08	External job information should be used according to the applicable rules and restrictions of the source.	Job Portal Documentation	Medium	Final
